1.INTRODUCTION

1.1 Project overview

This Project view provides an overview of the skill and job recommended for individuals interested in a career in any fields. It discusses the important role that any field plays in businesses and the various skills that are necessary for success in this field. It also outlines the different job opportunities available in any field and the different types of companies that employ any field professionals.

1.2 Purpose

Having lots of skills but wondering which job will best suit you ? Don't need to worry! we come up with a skill recommender solution through which the fresher or the skilled person can login and find the jobs by using search option or they can directly interact with the chatbot and get their dream job.

To develop an end to end web application capable of displaying the current job openings based on the skill set of the users. The users and their information are stored in the Database. An alert is sent when there is an opening based on the user skill set. User will interact with the chatbot and can get the recommendations based on his skills. We can use job search API to get the current job

openings in the market which will fetch the data directly from the webpage.

2. LITERATURE SURVEY

2.1 Existing problem

1. Students/Job seekers find their desired job based on their skillset.
2. Integrating Intelligent CHATBOT for job recommendation application.
3. A study of LinkedIn as an Employment Tool for Jobseeker & Recruiter.
4. Cloud storage and sharing services.

2.3 Problem Statement Definition

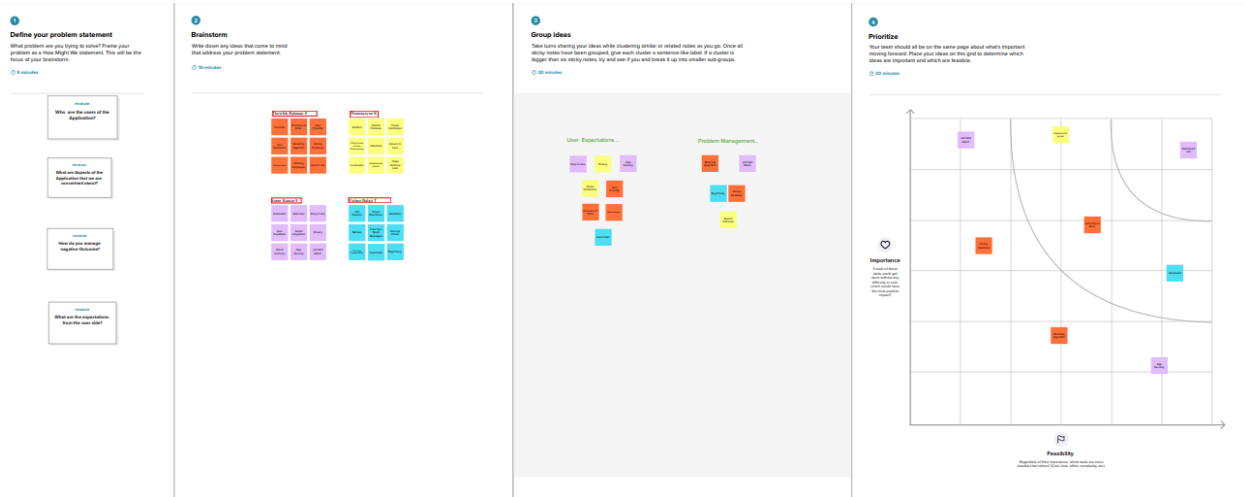

Dealing with the enormous amount of recruiting information on the internet, a job seeker always spends hours to find useful ones. Many times, people who lack industry knowledge are unclear about what exactly they need to learn in order to get a suitable job for them. We address the problem of recommending suitable jobs to people who are seeking a new job. Job recommender technology aims to help job seekers in finding jobs that match their skills. The internet caused a substantial impact on the recruitment process through the creation of e-recruiting platforms that become a primary recruitment channel in most companies. While companies established job positions on these portals, job-seekers use them to publish their profiles. E-Recruitment platforms accomplished clear advantages for both recruiters and job-seekers by reducing the recruitment time and advertisement cost. Recommender system technology aims to help users in finding items that match their preferences; it has a successful usage in a wide-range of applications to deal with problems related to information overload efficiently. In order to improve the e-recruiting functionality, many recommender system approaches have been proposed. This paper will analyze e-recruiting process and related issues for building personalized recommender system of candidates.

3. IDEATION & PROPOSED SOLUTION

3.1 Empathy Map Canvas

3.2 Ideation and Brainstroming

3.3 Proposed Solution

Project Design Phase-I

Proposed Solution Template

Date	10 OCTOBER 2022
Team ID	PNT2022TMID05552
Project Name	Project – Skill and Job Recommender (Cloud Application)
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	<ul style="list-style-type: none"> ➤ In order to Enhance the Opportunities and challenges to provide job. ➤ To Protect great volume of digital data ➤ To Satisfy the on the basis of the need and requirement of satisfaction.
2.	Idea / Solution description	<ul style="list-style-type: none"> ➤ To Reduce the Risk Assessment & Threat Analysis in the platform. ➤ Creating Prototype Solution so that user can access Easily.
3.	Novelty / Uniqueness	<ul style="list-style-type: none"> ➤ On-demand self service which help the user to gain knowledge regarding on specified job ➤ Mobile end point security that

		allows Organization to protect all the devices on their network and prevent unauthorized access.
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> ➤ Frequently updating about requirements and Full filling the needs. ➤ User will get a Responsive speed Regarding the job they have searched. ➤ User friendly Layout and approach design.
5.	Business Model (Revenue Model)	<ul style="list-style-type: none"> ➤ Commercializing about platforms in Social media, entertainment application so that user will have knowledge about our platforms how effective it is. ➤ Generating Revenue through the advertisement that display on the platform.
6.	Scalability of the Solution	<ul style="list-style-type: none"> ➤ Hyper scaling capabilities that includes the ability to provide and add more resources to the platforms. ➤ To improve job opportunities to fresher and unemployed person and also carrier

		development to the industrialization and organization.

3.4 Problem Solution Fit

Problem-Solution fit canvas 2.0

TEAM ID-PNT2022TMID05552

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? i.e. working parents of 0-5 y.o. kids The main customers for our project are : <ul style="list-style-type: none"> Persons who are seeking employment Persons that recruit job candidates 	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices. <ul style="list-style-type: none"> Concern about misuse of personal information Worry about unreliable connections Inadequate product knowledge Potential Scam Time-consuming 	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons define solutions here? i.e. pen and paper is an alternative to digital notetaking <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Pros</th> <th>Cons</th> </tr> </thead> <tbody> <tr> <td>Promotion of people's skillset</td> <td>Delivering false information</td> </tr> <tr> <td>Marketing of company infrastructure</td> <td>Occurrence of fraudulent activity</td> </tr> <tr> <td>Cultivate commercial relationship</td> <td>Intense competition</td> </tr> </tbody> </table>	Pros	Cons	Promotion of people's skillset	Delivering false information	Marketing of company infrastructure	Occurrence of fraudulent activity	Cultivate commercial relationship	Intense competition
Pros	Cons										
Promotion of people's skillset	Delivering false information										
Marketing of company infrastructure	Occurrence of fraudulent activity										
Cultivate commercial relationship	Intense competition										
Focus on J&P, top int C	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one, explore different sides. <ul style="list-style-type: none"> Create a platform to facilitate job searching A platform to make it simpler to identify people with the necessary skills Make the job-filtering process simpler Profile with safe personal data 	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? i.e. customers have to do it because of the change in regulations. <ul style="list-style-type: none"> Jobs that are listed on unreliable platforms maybe fraudulent Companies fail to disclose their true infrastructure Some job portals want payment in advance of the job starting. Users post false credentials Users pretend to have expertise in a skillset they lack 	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace) <ul style="list-style-type: none"> When Users apply for fraudulent jobs, they get unhappy due to wasted time Users were not satisfied when platforms allowed hirers to post jobs that were not real <ul style="list-style-type: none"> Cheating during online recruitment process When candidates with inadequate qualifications or a position, employers become irritated. 								
Identify strong TR & EM	3. TRIGGERS TR What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news. 4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Emotions-Before</th> <th>Emotions-After</th> </tr> </thead> <tbody> <tr> <td>Lack of knowledge about job vacancy</td> <td>User receive updates on job vacancies.</td> </tr> <tr> <td>No proper platform to showcase skillset</td> <td>Exhibit skillset in profile</td> </tr> <tr> <td>More paperwork during recruitment</td> <td>Easy recruitment process</td> </tr> </tbody> </table>	Emotions-Before	Emotions-After	Lack of knowledge about job vacancy	User receive updates on job vacancies.	No proper platform to showcase skillset	Exhibit skillset in profile	More paperwork during recruitment	Easy recruitment process	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. <ul style="list-style-type: none"> To develop an end-to-end web application which in default have a lot of current job openings through job search API out of which appropriate job will be recommended based on user skill set. At the same time students can develop their skills side by side with various courses and webinars offered by reputed organization. In addition to this a smart chat bot will be available for 24*7 which can help users in finding the right job. 	8. CHANNELS of BEHAVIOUR CH ONLINE What kind of actions do customers take online? Extract online channels from #7 <ul style="list-style-type: none"> Apply for jobs Review job applications Attend initial level assessment OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development. <ul style="list-style-type: none"> Final level interview Checkout location and infrastructure of company
Emotions-Before	Emotions-After										
Lack of knowledge about job vacancy	User receive updates on job vacancies.										
No proper platform to showcase skillset	Exhibit skillset in profile										
More paperwork during recruitment	Easy recruitment process

4. REQUIREMENT ANALYSIS

4.1 Function Requirement

Software Required:

Python, Flask, Docker

4.2 Non-Function Requirement

System Required:

8GB RAM, Intel Core i3, OS- Windows/Linux/MAC,Laptop or Desktop

5. PROJECT DESIGN

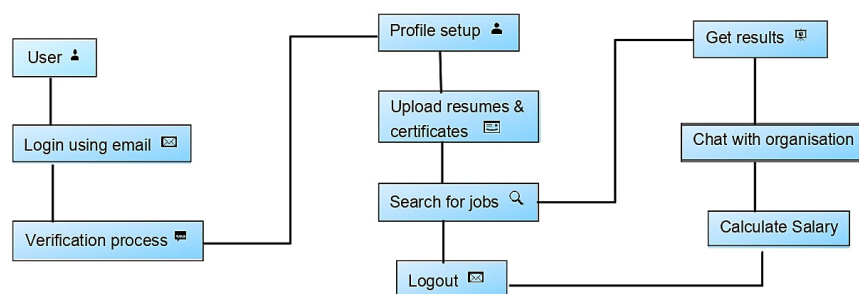

5.1 Data Flow Diagrams

Project Design Phase-II
Data Flow Diagram & User Stories

Date	26 OCTOBER 2022
Team ID	PNT2022TMD05552
Project Name	Skill/Job Recommender Application
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Gmail		Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password		High	Sprint-1
	Dashboard	USN-5	As a user, I can access my dashboard after signing in.	I can access my account / dashboard	High	Sprint-1
Customer (Web user)	Access	USN-6	As a user, I can setup a profile, and basic details by signing in.			
		USN-7	As a user, I will upload my resume, certificates, and other requirements.	I can perform several task in the application	Medium	Sprint-1
Customer Care Executive	Chatbot	USN-8	As a user, I can seek guidance from the customer care executive.		High	Sprint-1
Administrator	DBMS	USN-9	As a administrator, I can keep the applications of your organization relies on running.	I can perform various modifications in the applications.	High	Sprint-1

6. PROJECT PLANNING & SCHEDULING

6.1 Sprint Planning & Estimation

Project Planning Phase
Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	7 Nov 2022
Team ID	PNT2022TMID05552
Project Name	Skill / Job recommender
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	
Sprint-1		USN-2	As a user, I will receive confirmation email once I have registered for the application	1	High	
Sprint-2		USN-3	As a user, I can register for the application through Facebook	2	Low	
Sprint-1		USN-4	As a user, I can register for the application through Gmail	2	Medium	
Sprint-1	Login	USN-5	As a user, I can log into the application by entering email & password	1	High	
	Dashboard					

6.2 Sprint Delivery Schedule

VELOCITY:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per

iteration unit (story points per day)

6.3 Report from JIRA

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

";
        document.head.appendChild(t);
    });

```

7.3 Database Schema(if Applicable) :

```

import os
from sendgrid import SendGridAPIClient
from sendgrid.helpers.mail import Mail

# from_address we pass to our Mail object, edit with your name
FROM_EMAIL = 'Your_Name@SendGridTest.com'

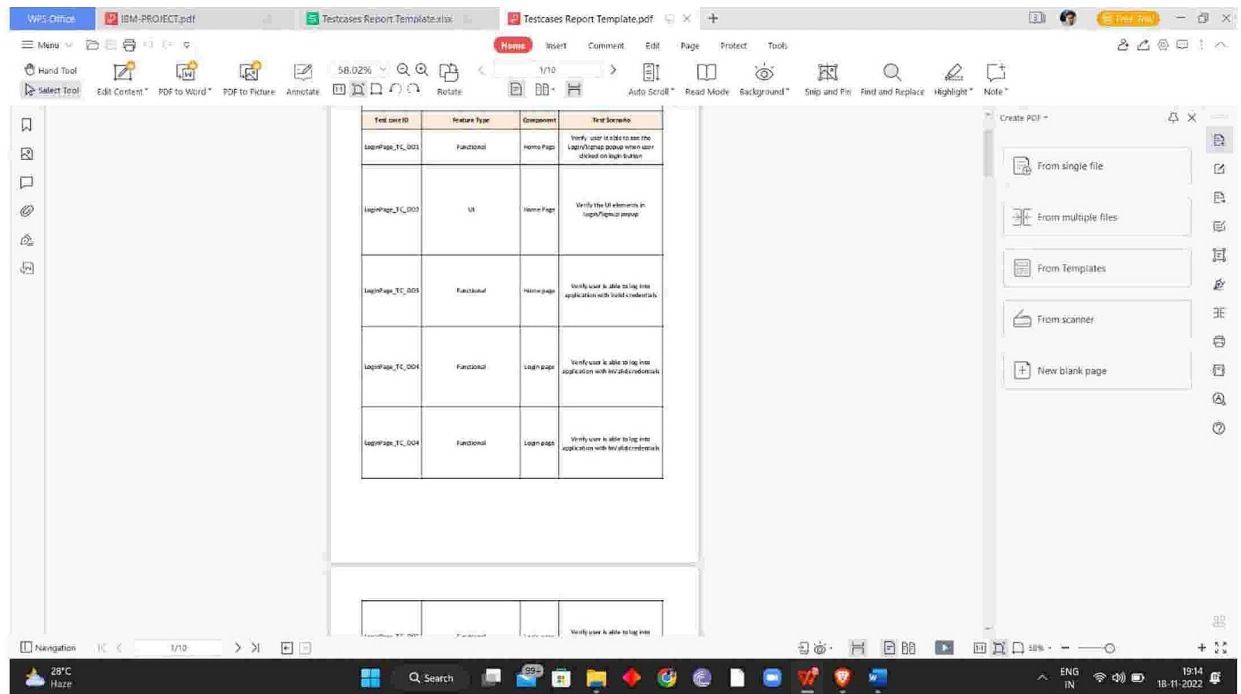

def SendEmail(to_email):
    """ Send an email to the provided email addresses
    :param to_email = email to be sent to
    :returns API response code
    :raises Exception e: raises an exception """
    message = Mail(
        from_email=FROM_EMAIL,
        to_emails=to_email,
        subject='A Test from SendGrid!',
        html_content='<strong>Hello there from SendGrid your URL is: ' + '<a
href="https://github.com/cyberjive">right here!</a></strong>')
    try:
        sg = SendGridAPIClient(os.environ.get('SENDGRID_API_KEY'))
        response = sg.send(message)
        code, body, headers = response.status_code, response.body, response.headers
        print(f"Response Code: {code}")
        print(f"Response Body: {body}")
        print(f"Response Headers: {headers}")
        print("Message Sent!")
    except Exception as e:
        print("Error: {0}".format(e))
    return str(response.status_code)\

```

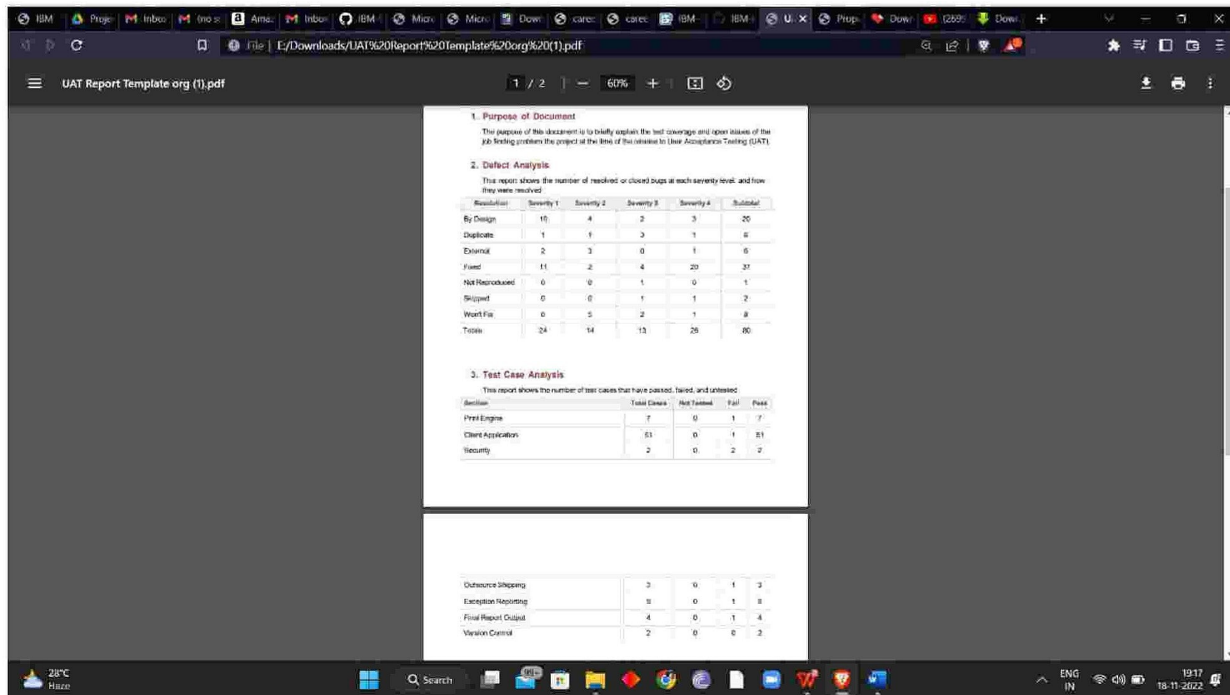

```
f_name_ == "_main_":  
SendEmail(to_email=input("Email address to send to? "))
```

8. TESTING

8.1 Test Cases

8.2 User Acceptance Testing

9. RESULTS

The project has been completed as we expected. We ensured that Database was designed and well connected to our project. The Expected results were gotten

10. ADVANTAGES & DISADVANTAGES

ADVANTAGES:

Person who looks for a job can easily find a suitable job based on their skill set.

Person can check their eligibility by attending eligibility test. Most of the Recruiters find the suitable person based on the scores

they have gotten in the eligibility.

DISADVANTAGES

Person Job May get technical difficulty while taking the eligibility
Job seeker may have trouble to contact recruiters directly.

11. CONCLUSION

The application has been developed to make job search easier .
The application that we have developed is user friendly. User can find a job based on their skillset in the short period of time. The job seeker certainly get benefit by using this application. In the addition, Chatbot Has been implemented with the help of IBM watson . The chatbot helps job seeker and organization when they experience the difficulties.

12. FUTURE SCOPE

The linked in the well known application to find a job and stay connected with professional and organization. The job seekers and organization use linked in to find a job. In the future , There are lots of possibilities to enhance our project similar to linked in.
